This economical series offers the beginning percussionist and band director a line of quality keyboard mallets at an affordable price. The Fundamental Series is available in 11 different models. All models feature black birch dowels and the two vibraphone models are also available with high quality rattan handles.

Innovative CT-3 Concert Series Medium General Timpani Mallets - The unique feel and balance of the Concert Series Timpani Mallets is created through the use of richly stained cherry wood handles. Each handle is hollowed out at the front and back of the shaft to create the feel and balance of bamboo mallets without the inconsistencies and durability issues normally associated with that material. The result is an exceptionally consistent and well-balanced timpani mallet. The five cartwheel models feature wood cores, woven felt liners, and the highest quality German felt covers, while the CT-6 Ultra Staccato model features a unique handle design with a hard felt ball head for increased articulation. The Concert Series Timpani Mallets unique design and craftsmanship are unlike any mallet available on the market today.

Innovative IPLD Lalo Davila Signature Model Concert Series Snare Drumsticks - Lalo Davila, Associate Professor of Music and Director of Percussion Studies at Middle Tennessee State University, has designed the IP-LD signature model concert snare drumstick to serve as an educational tool for the beginning snare drummer. The IP-LD is constructed of heartwood hickory, and features a slightly smaller diameter to better accommodate the smaller hands of a beginning player. The barrel shaped bead creates a full sound quality at any dynamic level, while the slightly longer taper results in an increased rebound and excellent balance. The Lalo Davila signature model is an excellent general purpose concert snare drumstick and the perfect tool for the percussion educator teaching young snare drummers.
